# Recipe App

Ryan Sickle   ●   Jessica Alves

Our idea ...

Purpose

"All aspiring chefs begin at home. This application is targeted at the home cooks. With recipes, required ingredients and steps required to reach culinary excellence. "

Our plan …

Cookbook Reader (Recipe - App)

Class Recipe
name = key (hash)
ingredients = key (hash)
steps = key (hash)
time = key

class Ingredient
quantity = "
name = "
type = "

WELCOME TO THE COOKING APP!
Please select from the following recipes.

→

Name of Recipe
- Ingredients - Time
Please press enter to begin the steps

→

Step 1
~~~
Press enter for step 2

* When we press enter for the next information, the previous information desappears.

Step 2
~~~

Bom Apetite!
(use ruby gems)

* if you want to check some information in the previous step, press (?) to come back.

→ TEXT - FORMAT Gems

Our tools ...

- GitHub
- Trello
- Slack

and also gems:

- json
- rainbow
- terminal table

Recipe App

Personal | 🔒 Private | RS 2

Project's Guidelines

As a homecook, I want to search and select a recipe so that I can use it and cook.

As a homecook, I want to access the recipe's information that I've selected so that I can know what ingredients and how much of them I have to use; all recipe steps; estimated total time to cook the selected recipe.

As a homecook I want to be able to choose which ingredient I want to use and see if there is a recipe that uses that ingredient

Workflow draft

📄 🔗 1

+ Add another card

To Do

For Next Iteration of the Applica...

As a developer, I need to find recipes open data (like json files) so that I can use it in my code.

For Next Iteration of the Applica...

as a developer I want to be able display recipes according to their ingredient selection

+ Add another card

Doing

As a developer I want to find a text-format gem so that I can use it to make a pretty display.

+ Add another card

Done

create a recipes list on the screen.

✅

As a developer I want to be able to display the ingredients needed to the selected recipe by the user, as well as estimated time to cook.

✅

As a developer I want to be able to display step by step the selected recipe so that make it easier to follow each step.

✅

As a developer I want to print an "Enjoy your meal!" screen so that would be a mark to finish the session and congratulate the user for having cooked the chosen recipe.

⭐ 👍 😊 ✅

REVIEW

As a developer I want to create a selection method so the user is able to select one of the recipes contained in the list.

+ Add another card

+ Add another list

... and how it really works !

Our hardest challenge …

Thank you !
